

WOOD PRODUCTS WITH HIDDEN JOINED MARKINGS AND A FINISHED VENEER LOOK

ABSTRACT

[0041] A wood slat having hidden joining marks and therefore having a desired veneer look, and method thereof is disclosed. In one embodiment, the wood slats have a long thin rectangular shape defining a face of the wood slat. The face comprises a plurality of periphery edges of first, manufactured slats; the first, manufactured slats also have a long thin rectangular shape defining a face. According to the preferred embodiment of the present invention, the plurality of periphery edges effectively hide the joining marks and give the wood slat the desired veneer look.
